SMART SOLUTIONS FOR RAILWAYS

OBJECTIVES

A Web page is designed for the public where they can book tickets by seeing the usable seats. After booking the train, the person will get a QR code. Which has to be shown to the Ticket Collector while boarding the train. The ticket collectors can scan the QR code to discover the personal details. A GPS module is present in the train to track it. The live status of the journey is updated in the Web app endlessly. All the booking details of the customers will be stored in the database with a unique ID and they can be retrieved back when the Ticket Collector scans the QR Code.
